## Industrial Mechanic, Monticello, AR

### Description

This position is in Monticello, AR. You must submit your application online. Please do not call our offices, as we will call you.

Candidate installs, maintains, and repairs heavy industrial machinery, focusing on precision alignment, preventative upkeep (lubricating, replacing parts), troubleshooting mechanical/hydraulic/pneumatic systems, and fabrication, requiring blueprint reading, welding, and use of precision tools to keep production running smoothly.

### Responsibilities

- Must follow ALL OSHA, company and job site safety rules.
- Installation & Assembly: Setting up new equipment according to technical drawings, using hoists, jacks, and hand/power tools for precise alignment.
- Maintenance: Performing preventative tasks like lubrication, cleaning, and routine inspections to prevent breakdowns.
- Repair & Troubleshooting: Diagnosing issues, disassembling machines, repairing or replacing components (bearings, gears, belts), and testing functionality.
- Fabrication: Welding, cutting, and modifying parts as needed.
- Safety: Adhering to strict safety protocols, including lockout/tagout procedures and operating heavy equipment like forklifts.

### Qualifications

- Technical Skills: Reading blueprints/schematics, mechanical aptitude, knowledge of hydraulics/pneumatics, welding (MIG, TIG, Stick), and precision measurement.
- Tools: Proficiency with hand tools, power tools, micrometers, laser alignment tools, and potentially cranes/hoists.
- Soft Skills: Strong problem-solving, attention to detail, manual dexterity, physical stamina (lifting, heights), and teamwork.
- Must be able to work in industrial settings (factories, mills) with high noise levels, heavy machinery, and potential for working in confined spaces or at heights.
