Telehandler/Forklift Operator

Description

Telehandlers/Forklifts are purpose-built for material handling and movement, and by attaching different accessories, these versatile machines can adapt to a variety of worksite tasks, including staging initial materials at the start of a job, lifting palletized and suspended loads and jobsite cleanup at the end of a job

Responsibilities

PRIMARY RESPONSIBILITIES:

- Safely load and unload materials and equipment from trailers/trucks
- Must be able to understand verbal, hand, and arm signals while operating.
- Must possess good communication skills
- Must fully comply with all safety standards.
- Must be able to operate in tight areas.
- Must understand load capacities for equipment used.
- Must be able to perform equipment inspections.
- Must be able to perform regular equipment maintenance.
- Must have a clean driving record.
- Must keep equipment clean.
- Must comply with all company policies.
- Write Job Safety Analyses for all work to be performed.
- Must be able to work in all types of environments, including inclement weather
- Must be able to get in and out of telehandler several times a shift.

SECONDARY RESPONSIBILITIES:

- Must be prepared to help with rigging when necessary.
- Must perform yard maintenance when required.
- Must be prepared to perform other duties... outside of operating equipment when needed.

Qualifications

POSITION REQUIREMENTS:

- Minimum 1 year of experience with a telehandler & forklift operator certification a plus.
- Diligent, with good hand-eye coordination needed to transport valuable equipment & material.
- Competent in pre-operational inspections requirements, operational requirements and shutdown procedures,
- Proficient in standard hand signals and general safety knowledge
- Must be willing to work outside and perform labor duties when assigned.
