Safety Technician

Description

It is extremely important that you do not call our offices.

We will call you if we feel that you are a good candidate for the position.

Candidate will assist in maintaining a safety culture within the company to eliminate injuries, reduce worker's compensation costs, improve safety performance and awareness, and sustain compliance with OSHA and MSHA regulations.

Responsibilities

- Must follow ALL OSHA, company, and job site safety rules
- Able to provide technical assistance and coaching to Employers Work Force
- Ensure personnel wear required safety equipment
- Educate and correct PPE infractions
- Perform hand and power tool inspections
- Assure a safe working environment on mill property by conducting weekly safety and housekeeping audits
- Perform constant observations of surroundings to identify hazards and mitigate those hazards
